Trnava 27 May 2011

Subject: Confirmation

This is to confirm that **TAKMA s.r.o.** provided its engineering services to our company at implementation of the projects performed in Slovakia.

In 2006 **TAKMA s.r.o.** started providing engineering activities and consultancy supporting services within the Project Management Unit of NPP V1 Bohunice decommissioning. Later the company continued with engineering services as well as on site supervision and coordination related to performance of the project "Replacement of main condensers tubes at turbo generators of NPP V2 Bohunice" till its completion in 2008.

The project of "Reconstruction of moisture separators and reheaters for turbo generators in NPP V2 Bohunice" was performed by our company since 2008. Corresponding engineering services as well as on site supervision and coordination related to replacement of 4 MSR, were performed by **TAKMA s.r.o.** from 2008 till the project completion in 2010.

All activities provided by **TAKMA s.r.o.** were always provided in required extent and quality without any delays. Its huge experience and excellent knowledge of NPPs and national ambient always enabled the company to support us at dealing with the Client, local authorities and suppliers. During our cooperation **TAKMA s.r.o.** proved its capabilities as an efficient, flexible and reliable partner. By participation at international projects its personnel has significantly improved English language skills in all aspects of communication, including translations and interpretations.

This confirmation has been issued based on the requirement of **TAKMA s.r.o.** for capability and experience reference purposes. The contact person for any questions shall be Ms.Katarina Grujbarova, kgrujbarova@iberdrola.es, +421 915 785 289.
