Dear Mr Magdálík,

Since 2002 NUPSESO engineering company acts as local partner of SIEMENS AG at reconstruction of the waste incinerating plant in Bratislava. Main goal of SIEMENS at this project is to implement technical features (mainly boilers, filters, turbine and their auxiliary plants) which are regardful to the environment.

Main tasks performed by NUPSESO engineering:

- collection, preparation and discussion of technical documentation with the client and regulatory body of Slovak Republic (Technická inšpekcia SR)
- elaboration of operation manual for incinerating plant
- commissioning(functional tests) of technological equipment including trial run
- technical support at guarantee period
- translation of technical documents from Slovak to German and vice versa.

We have been satisfied with demonstrated work approach and tasks performed by NUPSESO engineering at this project.

Mr Günter Lörner
Project Manager
