NPP Mochovce 1 & 2 References for NUPSESO engineering s.r.o.

Dear Mr. Magdalik,

NUPSESO engineering company acts as local partner of SIEMENS AG at Nuclear Power Plant Mochovce project since 1994. Main goal of SIEMENS at this project is to implement additional safety features to reach standards usual for western nuclear power industry.

Main tasks performed by NUPSESO engineering:

1. Acquisition of technical documentation and information concerning the project.
2. Technical support for Siemens project leader on site.
3. Assistance for safety measures specialists at particular technical tasks (special technical information, contact with local partners, participation on meetings).
4. Assistance at delivery of the Siemens supplies on site.
5. Translation of technical documentation from Slovak/Czech to English and vice versa.

NUPSESO engineering appears to be an expert company with good understanding of project design and having large operation experience with NPP equipped by Russian WWER type of reactors. Its members are familiar with both the site organisational structures and the plant supplier's system. Important are also their personal contacts with operator's and suppliers' staff. Till now we are satisfied with demonstrated work approach and tasks performed by personnel of NUPSESO engineering at this project.

Best regards

Friedrich Haidlen
